### TWO APPOINTMENTS MADE BY QUEEN MARY

Among the novel bedspreads are some of mosquito net with wreaths and borders of flowered cretonne and applique and others of spetted net with lace applique over satin slips.

Flowered cotton spreads that will wash, linen ones self-colored and in all shades, and trish linen ones with motifs of Irish lace, run the gamut from mere effectiveness to absolute loveliness.

MADE BY Q

Miss Sibyl Cadogan Join
Royal Household.

The tangette curl is not becoming to every woman, so beware of it unless you can make it an accessory to which have attracted a considerable amount of attention. Thus, Lady Isobel Gathorne-Hardy has become one of her ladies in waiting, and Miss Sibyl Cadogan Joins the bevy of

less you can make it an accessory to beauty. It can age the face and lend commonness to the features; but, on the other hand, if it suits you it is artistic and coquettish. The tangette curls can be bought attached to a little pin, so you can pin them in your own hair, or you can buy the spirit gum and cut a lock of your own hair, wet it and fasten it to the cheek with this solution. Futurist negligees have appeared. They are rather freakish affairs in Bakst blues and green and doubtless worm with green or blue wigs they would be bizars and startling enough to appease even the most amazing to appease even the most amazing longings with simple lines for the boundoir, consequently it is delightful to know some of the negligees reveal the fact woman is still beauty-loving.

New patterns are seen in dainty mo-

New patterns are seen in dainty mo-saic embroidery. Its airlness and har-monious colorings and the facility with which it can be done have assured its | Department. New building blocks of stone are es-

pecially constructed for outdoor use at the seashore or in the country, and are sure to delight children. Trowels, with these. There are also ti sections of framework that sections of framework that can be fitted together to simulate steel structure. Slates for roofing, bridges, rails, roof-like ridges—in fact, almost everything modern in the building line is to be found in this new box of build-ing materials.

A FEW THINGS

yersal favorite vegetable and grown in such immense quantities, we can af-ford to laugh at the curious notions our gramimothers entertained about this fruit, which they called the loveapple. It was introduced to the United

everturn all our previous notions by the statement that the main use of this organ is to filter out the impuri-ties of the air which enters the lungs

ties of the air which enters the lungs and so conduce to the health and vitality of the entire system.

He asserts that the vast majority of us have failed to take advantage of this indispensable aid to health. As proof he cites the fact that usually the sides of the nose collapse during inspiration, when the very opposite should occur. Indeed, the general disuse of the muscles involved has so weakened them that they no longer do weakened them that they no longer do their proper work. The result is that the air passages are partly or entirely blocked and the lungs receive more

The doctor argues that if the nose enormous reduction in diseases of the lungs and throat, not to mention a very pronounced improvement in the gen-eral health.

with the preux of flighness, that it is difficult to conceive him burying himself in the wilds of Albania.

There is no home garden which does not grow its tomato plant, so easy is it of culture and so prolific of fruit. The standard way of eating the tomato is as a vegetable ingredient for salad, raw and with dressing. Besides soup and stew made from it, another delicious way is to bake it whole.

USES OF THE NOSE

Heretofore it has been supposed that the principal function of the human nose is to smell. Now comes no less an authority than Dr. Owen F. Paget to everturn all our previous notions by
